LIC

DSNLU inaugurated the Legal Incubation Centre in 2018 which aims to develop entrepreneurship and advocacy skills among young lawyers and students. It acts as an institutional mechanism for providing various services including information on all aspects of professional skills required for budding lawyers.

A few objectives of LIC are -

- To encourage and support startups in the field of law with an interdisciplinary approach
- To bridge the gap between theory and practice
- To provide opportunities for experiential learning to students and young lawyers.

CSI

The objective of CSI is to learn more about the circumstances surrounding a crime by using physical evidence from the crime scene and use of inductive and deductive reasoning to analyze.

It is multidisciplinary and involves a systematic search of the crime scene with meticulous observation and documentation of the scene; photography and sketching; the identification, processing, and collection of physical evidence such as fingerprints, footprints, hair, fibers, biological fluids, and materials for DNA analysis; and perhaps the most important, the application of observational skills and reasoning capacity by the participants.
