Banking Industry in recent times has experienced a lot many changes with the liberalization in the licensing policy of the Reserve Bank of India. The number of new players has forayed into

Banking viz. Small Finance Banks, Payment Banks, NBFCs, Fintechs, etc giving stiff competition in the Banking industry as a whole. Further the penetration of Banking, notwithstanding the huge expansion in recent years, is far low compared to international standards. Further, there are a large number of managerial, financial, structural and technological issues facing the banking and non-banking financial organizations that need to be thoroughly investigated and resolved by research and consultancy to ensure long term sustainable growth of these sectors. Hence, the Academy will undertake research work exclusively to cater to the required needs of the Banking industry.
